TRACKS

Go on a World Tour with 10 brand new tracks!

These tiles allow you to create new shapes for your tracks. To do so, they have spaces which can extend from one tile to another.

You can identify these tiles by their special marks, and see how they connect together as shown below.

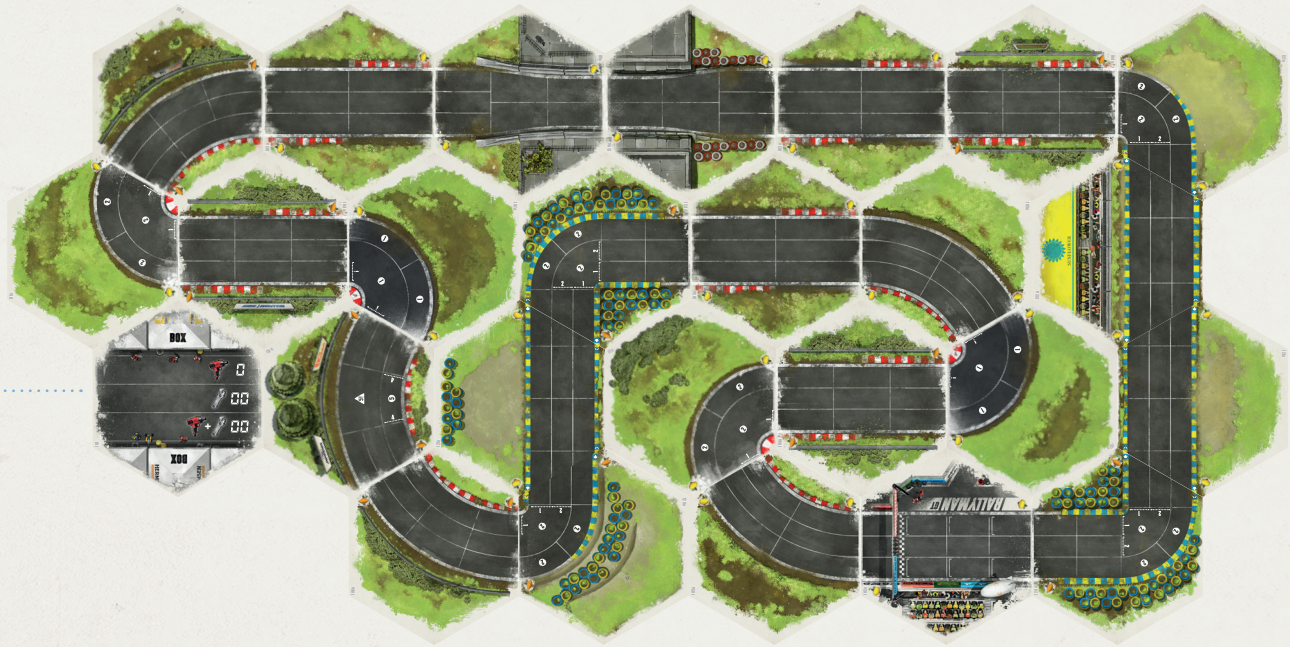

Contrary to the core box tiles, when these special marks are present the edge of one of these tiles does not count as a separation between spaces.

You will need the tiles from the Championship expansion in order to build some of the tracks shown in this booklet. You may of course use the tiles included in this set to create your own circuits without the need for any other expansions.
